PROFESSIONAL SUMMARY

Results-oriented Web application Developer with **6+ years of experience** building enterprise applications for **regulated industries**, including **banking and insurance**. Skilled in developing scalable web applications, optimizing performance, and collaborating with cross-functional teams to deliver compliant, production-ready solutions. Demonstrates a strong interest in AI tools, including building applications from scratch using AI-assisted development platforms such as Claude Code, to accelerate development workflows and enhance product innovation.

EXPERIENCE

FREELANCE WEB APP | MOBILE | WEBSITE | Nov 2025 – Present
Self-Employed

- Gather and analyze client requirements, translating business needs into scalable web and mobile solutions
- Develop full-stack applications using React (web) and React Native (mobile), MongoDB, Supabase
- Build and deploy end-to-end applications as a solo developer, managing the full development lifecycle
- Leverage AI-assisted development tools (e.g., Claude Code) to accelerate prototyping and improve code quality
- Collaborate directly with clients, handling project planning, timelines, and delivery
- Collaborate with third-party system providers to define integration requirements and implement seamless API integrations

SOFTWARE ENGINEER | Jan 2025 – Oct 2025
The Metropolitan Bank & Trust Company – Bonifacio Global City

- Collaborated with project managers and Scrum teams to design, develop, and deliver user stories within agile sprint cycles.
- Developed responsive and reusable front-end components using React.js, Redux-Saga, and Material-UI, following Figma design specifications.
- Implemented unit and component tests using Jest, improving code reliability and minimizing regression defects.
- Refactored legacy components into a micro-frontend architecture, enhancing modularity, scalability, and development efficiency.
- Contributed to backend microservices development using LoopBack 4, with database integration across MySQL, Oracle, and MongoDB.
- Wrote clean, maintainable, and well-documented code aligned with software engineering best practices and coding standards.
- Conducted peer code reviews to ensure code quality, performance, and long-term maintainability.
- Debugged and resolved application issues in collaboration with QA teams to ensure stable, defect-free releases.

REACT DEVELOPER & L2 APPLICATION SUPPORT | Nov 2022 – Dec 2024

Computer Professionals, Inc. – Bonifacio Global City

- Resolved production incidents by consolidating, analyzing, and validating reported bugs against business and technical requirements.
- Investigated, fixed, and optimized defects following best coding practices, preventing recurring issues such as performance bottlenecks and memory leaks.
- Performed front-end development, enhancements, and unit testing to deliver reliable, high-quality application features.
- Supported cross-functional Agile teams during sprint cycles by assisting with high-priority tasks and workload spikes.
- Conducted initial assessment and triage of incidents and service tickets, ensuring accurate and complete documentation in the ticketing system.
- Ensured completeness of incident details, including issue descriptions, logs, and screenshots, to streamline investigation and resolution.
- Investigated and assessed application issues through systematic analysis and troubleshooting.
- Performed Root Cause Analysis (RCA) to identify underlying issues and recommend long-term fixes.
- Monitored and analyzed production issues using Dynatrace, identifying system performance anomalies and application errors.

FULL STACK WEB DEVELOPER | Nov 2018 – Nov 2022

RDF Feed, Livestock & Food, Inc. – San Fernando Pampanga

- Design, develop, and maintain end-to-end web applications, covering both front-end and back-end functionality.
- Build responsive, user-friendly interfaces using React, TypeScript, HTML5, CSS3, and modern UI frameworks.
- Built reusable, component-based architectures while optimizing rendering performance and implementing best practices for state management.
- Develop and maintain RESTful APIs and backend services using Node.js, Express.js, or similar frameworks.
- Collaborated closely with UX/UI designers, product managers, and stakeholders to align application functionality with business and user requirements.
- Reviewed application requirements and interface designs to ensure compatibility with existing systems and standards.

EDUCATION

AMA ACLC College of Apalit – Apalit Pampanga | Bachelor's of Science and Information Technology | 2014 - 2018

Academic Excellence Awards CUM LAUDE (2017)

Dean's Lister (2015-2016)

Dean's Lister (2013-2014)

SKILLS

- Agile Collaboration
- Front-End Development
- Back-End Development
- Micro Front-End
- Microservices
- React JS
- Typescript

- Node JS
- Docker
- Git
- Docker
- BitBucket
- GitLab
- SQL
- Mongo DB
- HTML, CSS, JAVASCRIPT
